

Make Your Business Goals a Reality With Commercial Real Estate Financing

For countless business owners, one of the biggest dreams they hope to achieve is purchasing their own location for their company. It's not easy having to rent space for a business constantly, especially if the landlord takes a sizeable chunk of monthly profits or has strict stipulations that prevent expansion. At Church Commercial Resource Company, we're proud to help small business owners and other entrepreneurs qualify for the right commercial real estate financing solutions.

An Achievable Goal

Enjoying your own business location doesn't have to be a dream. You don't need to save up during decades to be able to afford it. There are many financial tools available to assist small businesses in getting a low-interest loan with comfortable repayment terms. We offer a variety of financing options that adapt to your specific needs:

- Small business loans for real estate
- Construction financing
- Equity loans
- Bridge loans
- Traditional real estate loans

No matter the size of your team, we can help you work towards this excellent business goal. Instead of putting pressure on your company, having a place to do business that is tailored to your needs can increase your profits significantly.

Excellent Interest Rates

With an SBA 504 or 7(a) loan, getting a large amount of financing is within reach of small businesses, even if they have less-than-perfect credit or cash flow. Conventional loans and equity financing can assist larger businesses that already have a commercial property but want to expand to a second location. With our experienced financing professionals by your side, it's not difficult to choose the type of loan that fits your budget, goals and entrepreneurial style the best.

Customized Loan Options

When it comes to real estate, each business has unique circumstances. Some companies purchase real estate to fix and flip homes. Other companies focus on managing commercial spaces or residential apartments. No matter how your business generates revenue, our commercial real estate financing tools can streamline operations for you. Contact us to learn about all the options available.
